Rexam Develops Cost-Effective Film for Deep Draw Applications

Rexam Medical Packaging introduces the newest addition to our portfolio of thermoformable films, INTEGRA® *Form MD*. This new cost-effective, olefin based multi-layer film offers exceptional performance for deep draw thermoforming applications where soft products are being packed. INTEGRA® *Form MD* has a wide forming range on a variety of form-fill-seal machines and seals well to various heat seal coated materials including INTEGRA® *Peel FM* peelable films.

INTEGRA® *Form MD* is suitable for EO, gamma and E-beam sterilization. According to Mike Oberkirch, Director of Marketing at Rexam Medical Packaging, "As the popularity of radiation sterilization continues to grow in the medical packaging industry, radiation stability becomes an important measure of medical packaging efficacy. INTEGRA® *Form MD* demonstrates excellent resistance to radiation over a broad range of dosages."

Rexam Medical Packaging is part of Rexam PLC, one of the world's five largest consumer packaging companies. Rexam Medical Packaging is recognized around the world as the premier supplier of medical packaging with its INTEGRA® product range. RMP has 11 manufacturing facilities worldwide with locations in the UK, Ireland, France, Mexico, Brazil, Singapore and the US and Puerto Rico, backed by a worldwide network of sales and technical support teams.
