## FOR IMMEDIATE RELEASE

### RADIUS SOLUTIONS CONTINUES TO GAIN MARKET SHARE IN EUROPE

**Chicago, IL – (Aug 9, 2005)** Radius Solutions, the leading supplier of ERP software to the print and packaging industry continues to secure new business opportunities even in an uncertain economy. While many ERP suppliers are struggling to make it on the short-list, Radius Solutions not only makes the list, they continue to make *sales* as well. The following companies have either added sites to their existing implementation of PECAS Vision or are now, new Radius customers.

**Boxes Group**, a member of the Dublin-based Clondalkin Group, will implement PECAS Vision II in their carton-making facility in Poland. This will be the first installation of Vision II in Poland and as part of the project the software will be translated into the Polish language.

**Cardinal Health** is installing a 45-user Vision II system in their Dublin, Ireland carton facility. The implementation includes all modules of Vision II, including Radius' integrated financials and our new Quality Management module.

**Ultimate Packaging**, one of the UK's largest producers of flexible packaging is implementing Vision II Estimating in their Grimsby plant.

**Alcan Tobacco Packaging** will implement PECAS Vision II in five European locations including plants in the UK, Holland and Germany.

**Scientific Games Corporation** will implement Vision II in their German facility. The Company has already successfully implemented PECAS Vision in their UK location and is looking forward to going live at their German plant.

In Holland, Maastricht-based **Wesly**, a successful producer of folding cartons will implement a 24-user Vision II system this year.

Radius Solutions is delighted to have gained these new opportunities in Europe and is looking forward to adding more customers and implementations of PECAS Vision to their extensive world-wide client list.
