PLASTIC SUPPLIERS, INC. ANNOUNCES MANUFACTURER DIRECT SALES TO THE ENVELOPE WINDOW FILM MARKET

COLUMBUS, OH – January 21, 2009 – Effective February 1st 2009, Plastic Suppliers will no longer distribute Dow Window Films. Moving forward, Plastic Suppliers will be offering PWF A/S (Polyflex Window Film) and EarthFirst® PLA to the window envelope market.

Plastic Suppliers, a worldwide manufacturer of polystyrene window envelope film since the 1970's, is proud to announce innovative and revolutionary alternatives to current envelope window film offerings in the marketplace. Our polystyrene film, PWF A/S, is produced using 21st century technology, offering the only anti-static / anti-scratch product available to the envelope market.

The ability to purchase direct from the manufacturer is something unique and will positively impact your bottom line. Offering improved characteristics to current window films, Plastic Suppliers is the only source for manufacturer direct pricing on both OPS and biopolymer envelope window films.

In addition to PWF A/S, Plastic Suppliers is the only manufacturer of a biopolymer plant based envelope window film. This biopolymer called EarthFirst® offers an environmentally friendly alternative to the envelope market. The ability to purchase both of these innovative films directly from the manufacturer truly makes Plastic Suppliers your total film solution.

If you have not already sampled PWF A/S or EarthFirst® window films, call (1-800-722-5577) for your free trial roll. For additional information on these as well as other products please visit www.earthfirstpla.com and www.plasticsuppliers.com.
