FOR IMMEDIATE RELEASE

MEGTEC Announces Retirement of Steve Rach

De Pere, Wis., U.S.A., March 30, 2009. MEGTEC Systems announces the retirement of Steve Rach effective April 1st. Steve is among a group of MEGTEC personnel who have elected to accept a voluntary early retirement package offered by the company.

Mr. Rach joined TEC Systems, a predecessor company of MEGTEC, in 1970 shortly after TEC was founded. Steve started as a designer/draftsman and progressed through different positions in the engineering group before finding his true calling as a valued member of the sales team in 1980. In sales, Steve was a strong customer advocate and was instrumental in helping TEC/MEGTEC to better understand the true needs of its customers. Steve also was extremely active in industry groups such as the Flexible Packaging Association (FPA) where he helped customers to understand the potential impact of regulatory proposals and work with the US Environmental Protection Agency to develop practical solutions.

Ken Zak, Vice-President: Industrial and Environmental Products Group for MEGTEC comments, "Steve's career spans virtually the entire history of TEC/MEGTEC. His great loyalty to his customers and to MEGTEC was obvious each and every day. Those who know Steve respect and admire his optimism and focus on doing what is right. His contributions are simply too numerous to mention".

As no one individual can replace Steve, his responsibilities will be distributed to the balance of the MEGTEC sales team. Please call your local MEGTEC representatives or, 800-558-2884, with any questions.

MEGTEC Systems, Inc.
830 Prosper Road
P.O. Box 5030
De Pere, WI 54115-5030

Steve will focus more of his time during retirement on the very important role of grandfather. MEGTEC asks all industry members to wish Steve well as he makes this transition. Steve will be greatly missed at MEGTEC Systems, but we hope and expect to see him in the future.

MEGTEC Systems is a leading supplier of pollution control systems, energy recovery systems, drying and web handling systems to the flexible packaging, coating, converting, web offset printing and many other process industries.
