

FOR IMMEDIATE RELEASE

Open Systems Announces Release of TRAVERSE Flexible Packaging Solution

May 1, 2009 - Minneapolis, MN – Open Systems, Inc., a single source provider of business management and accounting software for mid-sized companies, today announced the release of TRAVERSE Flex-Pack. The solution, being released at the version 10.5 level, is a new addition to the TRAVERSE product line.

TRAVERSE Flex-Pack is designed to handle the complex needs and unique standards of the flexible packaging industry. With comprehensive information from Flex-Pack, users can unite the production, inventory, customer/vendor tracking, and financial reporting aspects of their business.

"The features in Flex-Pack allow users to stay one step ahead of this ever-changing sector," said Open Systems VP of Sales Paul Lundquist. "It includes a specialized quoting module that handles particular requirements such as multiple layers and industry-specific units of measure, and it also facilitates enhanced inventory tracking by barcode—from receipt of raw materials right through shipment of finished goods."

TRAVERSE Flex-Pack also features an integrated touch screen data collection system that allows for real-time data entry directly from the production floor.

About Open Systems, Inc.

Founded in 1976 on the premise of delivering powerful accounting software solutions to small and mid-market customers, Open Systems is a single-source provider of accounting, distribution, manufacturing, not-for-profit, CRM and eBusiness solutions.
