

**AEP INDUSTRIES INC. REPORTS FISCAL 2009 SECOND QUARTER AND YEAR-TO-DATE RESULTS  
INCLUDING TWO PLANT CLOSINGS**

South Hackensack, NJ, June 9, 2009 - AEP Industries Inc. (Nasdaq: AEPI, the "Company" or "AEP") today reported financial results for its second quarter ended April 30, 2009.

On October 30, 2008, the Company completed the acquisition of substantially all of the assets of the Plastic Films division of Atlantis Plastics, Inc. ("Atlantis"). AEP and Atlantis were significant competitors in the plastic films industry for many years, competing to sell similar products to a similar customer base. One of the primary factors in AEP's determination to pursue and consummate the Atlantis acquisition was the potential realization of synergistic benefits derived from SKU consolidation, logistical savings, resin cost savings and product cost efficiencies. Immediately upon the completion of the acquisition, AEP began the process of reducing and combining SKU's, reformulating common products to their most effective common denominator and changing the manufacturing location of certain products to maximize operating and logistical efficiencies. The Company expects to devote significant time and effort throughout fiscal 2009 to achieve these synergistic benefits. However, as a result of the foregoing, no meaningful operational or financial information exists subsequent to the acquisition that segregates the impact of Atlantis from AEP as a whole. Therefore, although the Atlantis acquisition materially impacted AEP's net sales and results of operations for the three and six months ended April 30, 2009, the following discussion does not include any separate information regarding Atlantis.

Net sales for the second quarter of fiscal 2009 increased \$1.4 million, or 0.8%, to \$182.6 million from \$181.2 million for the second quarter of fiscal 2008. Net sales for the six months ended April 30, 2009 increased \$7.9 million, or 2.2%, to \$362.8 million from \$354.9 million in the same period of the prior fiscal year. This is the result of an increase in sales volume, driven by the Atlantis acquisition, partially offset by decreases in average selling prices resulting from a decrease in resin costs from the prior year periods. The Company noted that sales volume recovered in the second quarter of fiscal 2009 as customers began to restock following the first quarter of customers' normal destocking activities, but the Company continued to experience the adverse effects of the economic recession, causing total volume to be below management's expectations. The effect of foreign exchange on net sales during the three and six months ended April 30, 2009 was a negative impact of \$3.1 million and \$5.7 million, respectively, relating to the Company's Canadian operations.

Gross profit for the second quarter of fiscal 2009 increased \$19.3 million to \$41.7 million from \$22.4 million in the same quarter of the prior fiscal year. The improvement in gross profit is primarily due to increased volume combined with cost saving programs including the shut down of the Fontana, California plant, and internal initiatives designed to align production with demand at the Company's manufacturing facilities. There was also an improvement in material margin resulting from the pre-buying of inventory before the January resin cost increase and negotiated settlements with suppliers of prior period pricing differences. The second quarter of fiscal 2009 also included \$0.5 million of negative impact of foreign exchange relating to the Company's Canadian operations.

Gross profit for the first six months of fiscal 2009 increased \$39.6 million to \$89.8 million from \$50.2 million in the same period in the prior fiscal year. The increase in gross profit was primarily due to higher sales volume, combined with a \$26.4 million decrease in the LIFO reserve during the current period resulting from a decrease in resin prices during the first six months of fiscal 2009. The first six months of fiscal 2009 also included \$0.9 million of negative impact of foreign exchange relating to the Company's Canadian operations.

Operating expenses for the second quarter of fiscal 2009 increased \$1.0 million, or 4.2%, to \$24.1 million, and for the six months ended April 30, 2009 increased \$3.1 million, or 6.9%, to \$47.6 million, as compared to the same periods of the prior fiscal year. The increase is primarily due to higher delivery and selling expenses resulting from greater volumes sold in the respective periods and an increase in compensation costs recorded in accordance with SFAS 123R for the Company's stock options and performance units. Adjusting for a payment

during the three and six months ended April 30, 2008 of approximately \$1.6 million, excluding professional fees, related to a commercial dispute, general and administrative expenses increased from the respective comparable periods in the prior year primarily from transitional services associated with Atlantis, partially offset by a decrease in bad debt expense. Operating expenses for the three and six months ended April 30, 2009 includes a \$0.4 million and \$0.8 million favorable effect of foreign exchange, respectively, decreasing total operating expenses.

"Our previously announced efforts to maximize synergies of our 2008 acquisition of Atlantis Plastics, right-size our operations to mitigate effects of the economic recession and pay down debt have resulted in first and second quarter earnings surpassing management expectations." said Brendan Barba, Chairman and Chief Executive Officer of the Company. "Though we continue to experience adverse effects of the economy, we are actively and successfully implementing our plan, which includes a combination of additional cost-reduction efforts and debt repayment to navigate these challenging times. To date we have shut down our plant in Fontana, California, notified employees of a shut down of our plant in Cartersville, Georgia, and reduced headcount. Further, we have reduced debt from approximately \$250 million to approximately \$190 million."

Mr. Barba continued, "While we expect the remainder of 2009 to continue to be challenging, we expect volumes to modestly increase from existing levels, to realize additional synergies from the Atlantis acquisition, and to further reduce debt levels. We do not expect further plant closings."

On April 1, 2009, AEP repurchased and retired \$14.8 million (principal amount) of the Company's Senior Notes due March 2013 ("2013 Notes") at a price of 62.8% of par ("2013 Notes partial extinguishment"). The cash paid was \$9.4 million, which included \$0.1 million of accrued interest. In connection with the 2013 Notes partial extinguishment, the Company recognized a \$5.3 million gain on extinguishment of debt, net of the write-off of deferred debt issuance costs. For tax purposes, the gain will be recognized as taxable income in the Company's Federal tax return ratably over the fiscal years beginning October 31, 2014 through October 31, 2018.

Interest expense for the three months ended April 30, 2009 decreased \$0.2 million to \$3.9 million from \$4.1 million in the prior year period, resulting primarily from lower interest rates on Credit Facility borrowings and lower interest expense on AEP's 2013 Notes as a result of the 2013 Notes partial extinguishment, partially offset by higher average borrowings on the Company's Credit Facility during the three months ended April 30, 2009 as compared to the same period in the prior fiscal year. Interest expense for the six months ended April 30, 2009 increased \$0.2 million to \$8.3 million from \$8.1 million in the prior period, resulting primarily from higher average borrowings on the Company's Credit Facility during the six months ended April 30, 2009 as compared to the same period in the prior fiscal year, partially offset by lower interest rates on Credit Facility borrowings and lower interest expense on the Company's 2013 Notes as a result of the 2013 Notes partial extinguishment.

Net income for the three and six months ended April 30, 2009 was \$11.6 million or \$1.71 per diluted share and \$23.7 million or \$3.49 per diluted share, respectively. Net income for the three and six months ended April 30, 2008 was \$5.5 million or \$0.81 per diluted share and \$7.5 million or \$1.10 per diluted share, respectively. Included in the net income of the prior year periods is an after-tax gain of \$7.9 million related to the sale of the Company's Netherlands operation.

Adjusted EBITDA was \$26.9 million in the current quarter as compared to \$2.9 million for the three months ended April 30, 2008. Adjusted EBITDA for the six months ended April 30, 2009 was \$26.3 million, as compared to \$20.4 million for the six months ended April 30, 2008.

Reconciliation of Non-GAAP Measures to GAAP

The Company defines Adjusted EBITDA as income before discontinued operations, interest expense, income taxes, depreciation and amortization, changes in LIFO reserve, non-operating income (expense) and share-based compensation expense (income). The Company believes Adjusted EBITDA is an important measure of operating performance because it allows management, investors and others to evaluate and compare its core operating results, including its return on capital and operating efficiencies, from period to period by removing the impact of its capital structure (interest expense from its outstanding debt), asset base (depreciation and amortization), tax consequences, changes in LIFO reserve (a non-cash charge/benefit to its consolidated statements of operations), non-operating items and share-based compensation. Furthermore, management uses Adjusted EBITDA for business planning purposes and to evaluate and price potential acquisitions. In addition to its use by management, the Company also believes Adjusted EBITDA is a measure widely used by securities analysts, investors and others to evaluate the financial performance of the Company and other companies in the plastic films industry. Other companies may calculate Adjusted EBITDA differently, and therefore the Company's Adjusted EBITDA may not be comparable to similarly titled measures of other companies.

Adjusted EBITDA is not a measure of financial performance under U.S. generally accepted accounting principles (GAAP), and should not be considered in isolation or as an alternative to net income, cash flows from operating activities and other measures determined in accordance with GAAP. Items excluded from Adjusted EBITDA are significant and necessary components to the operations of the Company's business, and, therefore, Adjusted EBITDA should only be used as a supplemental measure of the Company's operating performance.

The following is a reconciliation of the Company's net income, the most directly comparable GAAP financial measure, to Adjusted EBITDA:

	Second Qtr. Fiscal 2009	April YTD Fiscal 2009	Second Qtr. Fiscal 2008	April YTD Fiscal 2008
	(in thousands)	(in thousands)	(in thousands)	(in thousands)
