**DuPont Teijin Films
to Consolidate US Film Production to Virginia Plant**

HOPEWELL, VA, July 28, 2009 -- DuPont Teijin Films has announced a plan to consolidate all US PET film production to its Hopewell, VA. location. The Florence, SC, plant will be phased down during that period with full closure of the facility planned at the end of 2010. A total of 210 manufacturing jobs, including 40 contract positions, will be impacted at the SC facility. Some of these positions will be relocated to the Hopewell facility to support the technology transfer from the Florence site.

“The consolidation of PET film operations into our Hopewell, VA, facility completes our strategic plan to address structural changes in our industry and positions us for solid growth in our key markets,” said Jean-Philippe Azoulay, President of DTF Americas. “The capability and productivity of the Hopewell Site are well suited to developments in electronics, medical and industrial markets as well as emerging green technology applications. Furthermore, with our Richmond Spruance operations specialized in Coated Flexible Packaging, and our overseas operations, we can supply a full range of solutions to our entire customer base.”

DuPont Teijin Films is a global joint venture partnership between DuPont and Teijin. DuPont Teijin Films offers a wide range of polyester films for markets including electronics, packaging, safety, health and protection, digital imaging and various industrial applications.

END

Additional notes to the Editor:

DuPont Teijin Films is a leading world producer of PET and PEN polyester films, specializing in film products and related services for the specialty, industrial, packaging and advanced magnetic media and photo systems, electrical and electronics markets. Brand names include Mylar®, Melinex®, and Teijin® Teton® PET polyester film, Teonex® PEN polyester film, and Cronar® polyester photographic base film. The business includes DuPont-Hongji Films Foshan Co., Ltd., a Chinese joint venture.

DuPont is a science company. Founded in 1802, DuPont puts science to work by solving problems and creating solutions that make people's lives better, safer and easier. Operating in more than 70 countries, the company offers a wide range of products and services to markets including agriculture, nutrition, electronics, communications, safety and protection, home and construction, transportation and apparel.

Teijin Limited, established in 1918, was the first Japanese company to produce rayon yarn, and has remained an innovator and leader in the development and commercialization of fibers. Since then, the Company has capitalized on its expertise in fibers to diversify into other fields. Today, the Company's operations encompass five segments: Fibers and Textiles; Films and Plastics; Pharmaceuticals and Home Health Care; Machinery and Engineering; and New Products and Other Businesses.

Foshan Plastics Group Co. Ltd. is a high-tech enterprise group producing mainly all kinds of plastic films, plastic sheets and plastic woven fabric laminates. Over the decades, Foshan Plastics Group has been providing new types of materials for the modern manufacturing industry, agricultural industry and other fields in modern science, transportation and communication. Its products have been leading the China market in terms of both volume and market shares with annual sales exceeding three billion RMB.

Forward-Looking Statements: This news release contains forward-looking statements based on management's current expectations, estimates and projections. All statements that address expectations or projections about the future, including statements about the company's strategy for growth, product development, market position, expected expenditures and financial results are forward-looking statements. Some of the forward-looking statements may be identified by words like "expects," "anticipates," "plans," "intends," "projects," "indicates," and similar expressions. These statements are not guarantees of future performance and involve a number of risks, uncertainties and assumptions. Many factors, including those discussed more fully elsewhere in this release and in documents filed with the Securities and Exchange Commission by DuPont, particularly its latest annual report on Form 10-K and quarterly report on Form 10-Q, as well as others, could cause results to differ materially from those stated. These factors include, but are not limited to changes in the laws, regulations, policies and economic conditions, including inflation, interest and foreign currency exchange rates, of countries in which the company does business; competitive pressures; successful integration of structural changes, including restructuring plans, acquisitions, divestitures and alliances; cost of raw materials, research and development of new products, including regulatory approval and market acceptance; and seasonality of sales of agricultural products.
