FPA Members Sponsor Industry Interns

FPA Converter Members Participate in 2010 Industry Scholarship & Internship Program

Linthicum, Maryland - May 10, 2010: This summer, several FPA converter members will participate in the 5th annual **FPA Flexible Packaging Academic Scholarship & Summer Internship Program**. FPA members **American Packaging Corporation, CL&D Graphics, Incorporated,** and **Constantia Hueck Foils LLC** will each provide a hands-on internship to a packaging and printing school student selected from a competitive pool of Program applicants. FPA and the sponsoring member companies will award academic scholarships to each of the students upon successful completion of their summer internship.

American Packaging Corporation welcomes University of Wisconsin-Stout student Scott Evers as an intern at the Story City, IA facility; **CL&D Graphics, Incorporated** is sponsoring packaging school student Rachel Wisth, who also attends the University of Wisconsin-Stout; and, **Constantia Hueck Foils LLC** is sponsoring Western Michigan University student Kelly Peters. During their internships these deserving students will learn about various aspects of the flexible packaging industry including daily facility operations, package design and product manufacturing.

As a part of the **FPA Student Leadership Initiative**, the **FPA Flexible Packaging Academic Scholarship & Summer Internship Program** provides career development opportunities for packaging and printing (or other areas of concentration utilized in the converting industry) school students and encourages them to pursue careers within the flexible packaging industry. For more information, contact FPA at (410) 694-0800 or visit www.flexpack.org.

*The **Flexible Packaging Association** has served as the voice of the flexible packaging industry since 1950. FPA members are manufacturers of flexible packaging sold to users or distributors for packaging purposes, and material or equipment suppliers to the industry. Flexible packaging is produced from paper, plastic, film, aluminum foil, or any combination of those materials, and includes bags, pouches, labels, liners, wraps, rollstock, and other flexible products.*
