Harper Corporation of America's James Kissner Appointed as Co-Chair of 2013 TLMI Technical Conference

Charlotte, North Carolina, August 2, 2011— Global anilox roll supplier Harper Corporation is excited to announce that James Kissner, Harper Corporation's Senior National Sales Manager, has been appointed as one of three co-chairs for the 2013 Tag & Label Manufacturers Institute (TLMI) Technical Conference.

The TLMI Technical Conference is held bi-annually in Chicago, Illinois. The conference provides industry professionals with a highly regarded event during which they can network within their field, access cutting-edge table top exhibits, and participate in presentations and workshops led by both peers and experts. The information that is shared during TLMI Technical Conferences is important to the growth of the industry as a whole, as it promotes innovation and provides a venue in which industry professionals can discuss new products and techniques.

The 2011 Conference will be held September 6-8, 2011. As an event that attracts large amounts of industry leaders, the Conference requires a great deal of planning, which is why co-chairs are announced two years before their event takes place.

"I appreciate the opportunity to serve the industry," commented Kissner, "and look forward to this challenge."

Serving alongside Kissner as 2013 Conference co-chairs are Wade Fouts, from Wilson Manufacturing, and Michelle Shaieb, from Whitlam Label Company.

For further information, please contact Jazmin Kluttz at 704-588-3371 or jkuttz@harperimage.com.
