NEX Performance Films Launches New Coex Line at Milton, Wis., Plant

State-of-the-Art Windmoeller & Hoelscher Three-Layer Varex Line Adds 5.5M Pounds Capacity

MILTON, Wis. – September 14, 2011 – NEX Performance Films (www.nex-films.com) announced that it has completed the installation and startup of a new Windmoeller & Hoelscher (W&H) three-layer Varex coextruded blown film line at its Milton, Wis., plant.

The new line adds an additional 5.5M pounds to NEX Films' coex capacity. It also uses W&H's state-of-the art die design, gauge control, blending, and winding technologies.

By investing in the new line, NEX Films can expand its high-performance blown film capabilities, and further demonstrate its commitment to the market and its customers.

“This new line will allow us to continue to provide our customers with the service and quality they've come to expect from NEX,” said Kathy Bolhous, NEX Films' CEO. “We've seen considerable growth in our business and we're committed to investing in the equipment needed to support this growth.”

-- more --

“We believe in giving our team the tools for success,” Bolhous added. “The W&H extrusion lines are some of the finest in the world.”

NEX Performance Films, a \$100M blown film manufacturer headquartered in Milton, Wis., produces superior-quality monolayer, coextruded, and barrier films for flexible packaging. For over 20 years, NEX has offered a comprehensive portfolio of custom-engineered solutions and commodity products for every application.
