Harper Corporation's Phantom QD™ Generates Buzz at Labelexpo Europe 2011

Charlotte, North Carolina, November 2, 2011— Harper Graphics, licensee of global anilox roll supplier Harper Corporation, exhibited the motorized Phantom QD™ Proofing System at Labelexpo Europe 2011 in Brussels, Belgium.

The Phantom QD™ motorized flatbed proofing system is a cutting-edge ink proofer, available in a Flexo or Gravure version. Harper Corporation was proud to share it and all its features with the hundreds of attendees who stopped by the booth. This ground-breaking tool generated a great deal of attention and discussion at the event.

The Phantom QD™ comes with a list of standard features, including: constant loading pressure, portability, magnetically loaded Doctor Blade, glass surface, hard coated finish, quick change anilox rollers, a solid handle without a spring, a snap-in blade holder, and interchangeable anilox and rubber rolls, among others.

Because of its innovative design and competitive price, the Phantom QD™ ink proofing system has achieved a shift in the flexographic industry. With its ease of operation and repeatability, this product has been able to change the way that industry professionals approach ink and press room efficiency.
