**Release: Immediate**

### **Piacenza, Italy: December 18<sup>th</sup>, 2018**

Nordmeccanica, the largest manufacturer of coating and laminating machinery serving the flexible packaging industry, has announced an agreement with ePac Flexible Packaging to acquire 10 solvent less “Super Simplex SL e800” laminators. ePac will deploy the units as it rolls out its expansion plans for a total 15 manufacturing plants by the end of 2019.

A signing ceremony was held at the Corporate offices in Piacenza, Italy during the celebration of Nordmeccanica’s 40<sup>th</sup> Anniversary. The order represents the largest ever recorded in the flexible packaging industry for solvent less laminators. The relationship between the two companies dates back to the opening of ePac’s first plant in May of 2016 in Madison, WI. Since then, ePac has exclusively used Nordmeccanica laminators in its: Boulder, CO; Miami, FL; Chicago, IL, and Austin TX locations.

“Nordmeccanica has been proudly serving with laminators the business of digital printing since the early days of the technology. Solvent less has been the lamination technology of choice for players in the digital arena thanks to no emissions, low energy consumption, and the ability to serve multiple digital presses with a single off-line laminator”, said Nordmeccanica’s President Antonio Cerciello.

Added Virag Patel, ePac’s Chief Operating Officer: “Nordmeccanica worked closely with us to configure a machine that met our specific requirements and compliments our service delivery model for rapid job turnaround. We’re also evaluating downstream coating and combi solutions to add cold seal/spot embellishments.”
