PRESS RELEASE | Reifenhäuser Group

May, 8, 2019

Reifenhäuser Blown Film GmbH announces the sale of 4 co-extrusion lines

Sigma Plastics Group, one of the largest North American based film producers have ordered a total of 4 coex blown film lines from REIFENHÄUSER Blown Film GmbH a leading extrusion equipment manufacturer.

For their BJK (Louisvile KY) operation Sigma ordered two high output 5-layer PE dedicated lines both equipped with Reifenhäuser's unique ULTRA COOL IBC and ULTRA FLAT patented inline flattening system. BJK currently has two 5-layer lines with ULTRA FLAT from Reifenhäuser which has allowed them to enter new markets.

For Sigma's Allied Extruders division two additional lines were sold. One line is a 3-layer high output and the 2nd line is a 5-layer high output PE dedicated line. Both lines will also be equipped with ULTRA COOL and ULTRA FLAT. Allied Extruders currently has Reifenhäuser extrusion equipment as well.

With this investment Sigma Plastics Group shows their commitment to the flexible packaging industry and reinforces their position in the North American market.

The Reifenhauser Group will be highlighting their extrusion technology at the NPE show at booth W3031.

About the Reifenhäuser Group

The Reifenhäuser Group, based in Troisdorf near Cologne, Germany, is the world's leading supplier of plastics extrusion lines, machines, and components. The group has the world's largest company knowledge network for extrusion technology: Six business units with nine subsidiaries bundle highly specialised knowledge in design, process technology, automation systems, project planning, manufacturing, project management and logistics. As a whole, the group covers the largest range of extrusion technologies. Its companies offer systems for the production of film, sheet, nonwovens, monofilaments, and the relevant components. The company was founded in 1911 as a forge and is managed today for the third generation by brothers Bernd and Ulrich Reifenhäuser.
