

Unmanifested Waste Reports

Normally, all of the hazardous wastes accepted by a hazardous waste treatment, storage, or disposal facility (TSD) are accompanied by a hazardous waste manifest. What should the TSD do if they accept a hazardous waste that was not accompanied by a manifest? According to 40 CFR 264/265.76, if a TSD accepts for treatment, storage, or disposal any hazardous waste from an off-site source without an accompanying manifest, or without an accompanying shipping paper (an is not excluded from the manifest requirement), then the owner or operator must prepare and submit a single copy of a report to the implementing agency within fifteen days after receiving the waste. The unmanifested waste report must be submitted on EPA form 8700-13B. The report must be designated "Unmanifested Waste Report" and include the following information:

- The EPA identification number, name, and address of the facility
- The date the facility received the waste
- The EPA identification number, name, and address of the generator and the transporter, if available
- A description and the quantity of each unmanifested hazardous waste the facility received
- The method of treatment, storage, or disposal for each hazardous waste; The certification signed by the owner or operator of the facility or his authorized representative; and
- A brief explanation of why the waste was unmanifested, if known.
