

COLUMBIA UNIVERSITY
EARTH ENGINEERING CENTER

**IDENTIFICATION AND ASSESSMENT OF AVAILABLE
TECHNOLOGIES FOR MATERIALS AND ENERGY RECOVERY
FROM FLEXIBLE PACKAGING WASTE (FPW)**

Nickolas J. Themelis and Ljupka Arsova

Report to Flexible Packaging Association

New York City, August 1, 2011

TABLE OF CONTENTS:

| | |
|---|----|
| EXECUTIVE SUMMARY | 1 |
| 1. BACKGROUND | 5 |
| 1.1 INTRODUCTION | 5 |
| 1.2 SCOPE AND OBJECTIVES OF THE STUDY | 5 |
| 1.3 FLEXIBLE PACKAGING | 6 |
| 1.3.1 Definition..... | 6 |
| 1.3.2 Examples of the flexible packaging products..... | 6 |
| 1.3.3 Quantity of FPW generated in the U.S..... | 9 |
| 1.3.4 Where is the U.S. FPW going today..... | 9 |
| 1.3.5 Most commonly used materials for production of Flexible Packaging..... | 12 |
| 1.4 CHEMICAL CHARACTERISTICS OF THE PLASTIC MATERIAL USED FOR PRODUCTION OF FLEXIBLE PACKAGING | 13 |
| 1.4.1 Polyethylene (PE) | 14 |
| 1.4.2 Polypropylene (PP) | 16 |
| 1.4.3 Polyvinyl Chloride (PVC) | 16 |
| 1.4.4 Polyester | 16 |
| 1.4.5 Nylon | 17 |
| 2. The WASTE MANAGEMENT HIERARCHY | 18 |
| 3. FLEXIBLE PACKAGING WASTE MANAGEMENT OPTIONS | 20 |
| 3.1 PRIMARY RECYCLING: | 20 |
| 3.2 SECONDARY RECYCLING: | 20 |
| 3.3 TERTIARY/ CHEMICAL RECYCLING; | 21 |
| 3.3.1 Pyrolysis: | 21 |
| 3.3.2 Gasification: | 28 |
| 3.4 QUATERNARY RECYCLING OR ENERGY RECOVERY FROM FPW | 36 |
| 3.4.1 Engineered Solid fuel..... | 37 |
| 3.4.2 Boilers fuelled by FPW and other plastic wastes | 37 |
| 3.4.3 Expansion of U.S. WTE capacity..... | 38 |
| 4. DETAIL PROFILES OF THE COMPANIES INTERESTED IN TESTING THE FPW AS A FEEDSTOCK | 39 |
| 4.1 PYROLYSIS COMPANIES | 40 |
| 4.1.1 Envion Inc..... | 40 |
| 4.1.2 Natural State Research, Inc..... | 49 |
| 4.1.3 Covanta Energy Corporation..... | 51 |

| | |
|---|-----------|
| 4.1.4 Climax Global Energy Inc..... | 54 |
| 4.2 GASIFICATION COMPANIES..... | 57 |
| 4.2.1 Plasco Energy Group..... | 57 |
| 4.2.2 Westinghouse Plasma Corporation a division of Alter NRG..... | 62 |
| 4.3 ENGINEERED SOLID FUEL PRODUCTION..... | 68 |
| 4.3.1 Dongara..... | 68 |
| 5. DISCUSSION..... | 72 |
| 6. CONCLUSIONS..... | 77 |
| 7. RECOMMENDATIONS..... | 78 |
| 8. BIBLIOGRAPHY..... | 79 |
| Appendix 1..... | 82 |
| <i>Info about the project and questionnaire sent to the identified providers of the targeted technologies;.....</i> | <i>82</i> |
| Appendix 2..... | 85 |
| <i>Company profile of the wTe Corporation.....</i> | <i>85</i> |

List of tables:

| | |
|--|----|
| Table 1. Characterization of residue from regional plastics MRF (EEC, 2010) | 11 |
| Table 2. Percentage of different plastic types used as film or resins in the production of FP in 2008 (SOI, 2009) | 13 |
| Table 3. Typical chemical composition of most common plastics | 14 |
| Table 4. Waste Management Hierarchy in EU and U.S. legislation | 18 |
| Table 5. Waste management hierarchy developed for packaging waste..... | 19 |
| Table 6. Performance metrics of the Envion Oil generator..... | 46 |
| Table 7. Economics of the Envion commercial scale plant..... | 47 |
| Table 8. Total costs of commercial scale plant | 56 |
| Table 9. Economic analysis of Alter NRG plant..... | 65 |
| Table 10. Economics of Dongara commercial scale plant..... | 71 |
| Table 11. Costs of the recommended technologies | 76 |
| Table 12. Testing conditions for the recommended technologies..... | 78 |

List of figures:

| | |
|---|---|
| Figure 1. Stand-up flexible pouch for dry goods..... | 7 |
| Figure 2. Stanch-up pouch for beverages | 7 |
| Figure 3. Flexible Parcel Mailer..... | 8 |
| Figure 4. Multi-unit shrink wrap flexible packaging..... | 8 |

| | |
|---|----|
| Figure 5. Brick pack coffee packaging | 9 |
| Figure 6. Salty snacks flexible packaging | 9 |
| Figure 7. Flexible Packaging Material Purchased in 2008 (SOI, 2009) | 12 |
| Figure 8. Ethylene, C ₂ H ₄ , monomer..... | 14 |
| Figure 9. Propylene, CH ₃ , monomer | 16 |
| Figure 10. Vinyl chloride monomer | 16 |
| Figure 11. Expanded Hierarchy of Waste Management (Themelis, 2008) | 18 |
| Figure 12. Pyrolysis Conversion Products (after Heermann et. Al, 2001) | 22 |
| Figure 13. Schematic diagram of the BP Polymer Cracking process (Tukker et. Al, 1999)... | 24 |
| Figure 14. Schematic diagram of the BASF process (Tukker et. Al, 1999) | 25 |
| Figure 15. Schematic diagram of the VEBA process..... | 25 |
| Figure 16. Gasification Conversion Products (after Heermann et. Al, 2001) | 29 |
| Figure 17. Schematic diagram of the Texaco gasification process..... | 32 |
| Figure 18. EUP- EBARA UBE Process for Gasification of Waste Plastics..... | 33 |
| Figure 19. Schematic diagram of the Thermosteel gasification proces..... | 34 |
| Figure 20. Representatives of EEC with Mr. Goco in front of the Envion plastic-to-fuel plant..... | 41 |
| Figure 21. Mixed plastics used as a feedstock at Envion..... | 42 |
| Figure 22. Block flow diagram of Envion Plastic-to-Oil Process..... | 43 |
| Figure 23. Oil product of the Envion process produced during the EEC visit..... | 44 |
| Figure 24. Heavy oil residue, by-product of Envion process..... | 45 |
| Figure 25. Non-recyclable plastic used as a feedstock..... | 54 |
| Figure 26. Plasco gasification plant, Canada | 58 |
| Figure 27. Block flow diagram of the Plasco Energy Conversion technology (Plasco Energy Group, 2010)..... | 58 |
| Figure 28. Alter NRG Plasma Gasifier | 63 |
| Figure 29. Process diagram of the Dongara plant..... | 70 |
| Figure 30. Sample material from the wTe Corporation plastic recovery plant 1..... | 87 |
| Figure 31. Sample material from the wTe Corporation plastic recovery plant 2..... | 87 |
| Figure 32. Sample material from the wTe Corporation plastic recovery plant 3..... | 88 |
