Prestige-Pak invests in additional Fusion C flexographic press from PCMC *Purchase marks company's second in two years as growth continues*

Green Bay, Wis. – Jan. 9, 2020 – Paper Converting Machine Company (PCMC), part of Barry-Wehmiller, is pleased to announce that [Prestige-Pak](#) of Fond du Lac has purchased a new Fusion C flexographic press. The press will be the second Fusion C (and the fourth PCMC press) for Prestige-Pak, a second-generation, family-owned business, and producer of printed and laminated flexible packaging materials.

“We’re looking forward to our new Fusion C press,” said Vince Kuber, President of Prestige-Pak. “Our Fusion C and Fusion presses have helped us better meet the needs and requirements of our customers. We’ve experienced significant growth, and that has prompted us to add an additional press. One deciding factor in choosing PCMC is the fact that the company’s machines are engineered and built in the United States.”

The Fusion C is loaded with fast make-ready and waste-saving features, all in a smaller footprint with fewer parts. This reliable flexographic press also includes PCMC’s SteadyPrint print-stabilization technology, winner of the 2019 FTA Technical Innovation Award. With this feature, the bearing arrangement is coupled with an algorithm that uses noise-canceling technology to largely remove the impact of bounce when printing graphics with hard edges. With patents pending on all features, SteadyPrint is currently the only product on the market using this kind of technology to eliminate disturbances and monitor in real time.

Prestige-Pak’s second Fusion C press will continue to help the company move forward with its vision of excellence and customer satisfaction through state-of-the-art equipment, preferred vendor affiliations, rigid industry certification and environmental stewardship.

“It’s a privilege for PCMC to continue to be able to grow with Prestige-Pak,” said Mike Shaw, Regional Sales Manager, PCMC. “We’re honored to be part of the growth of a fellow Wisconsin company.”

ABOUT PAPER CONVERTING MACHINE COMPANY (PCMC)

Paper Converting Machine Company (PCMC) specializes in the design and manufacture of high-performance converting machinery for the tissue, nonwovens, package-printing and bag-converting industries worldwide. Our comprehensive product offerings include rewinding, laminating, printing, embossing, perforating and packaging equipment for tissue and towels; folding and converting machines; and a complete range of flexographic printing presses and laser anilox cleaners, serving the flexible-packaging, prime-label and carton-converting industries. For more about PCMC, which is part of Barry-Wehmiller, go to pcmc.com.

ABOUT BARRY-WEHMILLER

Barry-Wehmiller is a diversified global supplier of engineering consulting and manufacturing technology for the packaging, corrugating, sheeting and paper-converting industries. By blending people-centric leadership with disciplined operational strategies and purpose-driven growth, Barry-Wehmiller has become a \$3 billion organization with nearly 12,000 team members united by a common belief: to use the power of business to build a better world.
