The Flexible Packaging Achievement Awards & Innovation Showcase

The Flexible Packaging Association (FPA) is pleased to present the 2021 *Flexible Packaging Achievement Awards & Innovation Showcase*, which features flexible packaging solutions that meet expectations and needs through advancements in materials, graphics, structure, new uses, extended shelf life, and sustainability.

The “Achievement Awards” section of the showcase highlights the 20 winning entries, arranged by award level: Highest Achievement, Gold, and Silver. The entry categories include: Expanding the Use of Flexible Packaging, Packaging Excellence, Printing, Shelf Impact, Sustainability, and Technical Innovation. The “Innovation Showcase” section includes the competition entries, which are presented in alphabetical order by package name. This year, 75 package entries were submitted for the competition, with a total of 201 entries (some packages were entered into multiple categories).

FPA congratulates the winners and thanks all the companies that participated in the 65th Annual Flexible Packaging Achievement Awards Competition. Special thanks are given to the 2021 competition judging panel: Cory Francer, Editor-in-Chief, *Packaging Impressions*; David Luttenberger, Global Packaging Director, Mintel Group Ltd.; and Keith Vorst, Ph.D., Director, Polymer and Food Protection Consortium, Iowa State University.

A comprehensive list of FPA converter and associate members is also included.

HIGHEST ACHIEVEMENT AWARD

The Highest Achievement Award is evaluated by the judges as possessing overall packaging excellence, significant attributes in all award categories, and contributing most to the advancement of the industry.

CRUNCH PAK'S TOY STORY LUNCH KITZ

Highest Achievement Award

Gold Award – Technical Innovation

Manufacturer: American Packaging Corporation, www.americanpackaging.com

End-User/Customer: Crunch Pak

Plant: Story City, IA

Designer/Design Firm: Information not available

Key Supplier: American Packaging Corporation

Description: American Packaging Corporation (APC) is proud to be part of the packaging for Crunch Pak's Lunch Kit. Lunch Kit is a 4 oz. snack tray with individual compartments containing fresh sliced apples, an artisan cracker, string cheese, and Italian salami. The foods are fresh and healthy, including the salami which is without nitrates, nitrites, or artificial ingredients.

GOLD AWARDS

AMCOR'S DUAL CHAMBER POUCH

Gold Award - Technical Innovation

Manufacturer: Amcor Flexibles, www.amcor.com

End-User/Customer: Boston Scientific

Plant: Mundelein, IL

Designer/Design Firm: Information not available

Key Suppliers: Information not available

Description: The Amcor Dual Chamber Pouch is a specialty multi-layer pouch with a breathable membrane. The product consists of a peelable device chamber and a non-peelable desiccant chamber, and the desiccant is kept separate from the device with a symmetric coextruded vented nylon film. This solution is ideal for moisture-sensitive products including drug-coated products which may have an adverse reaction to various gasses found within the atmosphere of the package. It is also suitable for EtO sterilization.

ARBOR TEAS ORGANIC TEA

Gold Award - Sustainability

Manufacturers: Polykar (www.polykar.com), Eagle Flexible Packaging (www.eagleflexible.com), and Futamura USA, Inc. (www.futamuragroup.com)

End-User/Customer: Arbor Teas

Plant: Saint-Laurent, Quebec, Canada

Designer/Design Firm: Arbor Teas

Key Suppliers: Polykar, Eagle Flexible Packaging, and Futamura USA, Inc.

Description: Compostable films are united to create an environmentally friendly tea packaging solution. The labels of the packaging are composed of hemp-based or sugarcane-based paper. The sealant layer is PKBIO200C from Polykar. This film is derived from resin which is partially bio-based from corn feedstock. It has high clarity and a low seal initiation temperature. The print web of the multi-layer structure is NatureFlex™ from Futamura, a compostable cellulose film based on wood pulp from sustainably managed sources. These materials also reduce the weight of the packaging when compared to paperboard tubes or kraft bags. The material in Arbor Teas' packages requires a less optimized environment for biodegradation, representing a major advance in low-impact packaging.

CHAMELEON™ FOR TYVEK®

Gold Award - Expanding the Use of Flexible Packaging

Manufacturer: PAXXUS, Inc., www.paxxus.com

End-User/Customer: Information not available

Plant: Addison, IL

Designer/Design Firm: Information not available

Key Suppliers: Information not available

Description: Chameleon™ for Tyvek® allows the user to readily evaluate the quality of a seal when used with uncoated Tyvek®. Before opening, the seal shows as a darker color when viewed through the film side. Once the package has been peeled open, a vivid colored seal indicator presents on the Tyvek® with a contrasting white seal indicator on the film. The easy ability for users to identify any seal flaws addresses the new EU Medical Device Regulation requirements that the “integrity of the packaging is clearly evident to the final user” while providing a consistent, smooth, fiber-free peel.

HUNTER'S® GOURMET - QUINOA CHIPS

Gold Award - Packaging Excellence

Gold Award - Printing

Gold Award - Shelf Impact

Manufacturer: Emirates Printing Press, L.L.C., www.eppdubai.com

End-User/Customer: Hunter Foods - UAE

Plant: Dubai, UAE

Designer/Design Firm: Information not available

Key Suppliers: Information not available

Description: The first thing that consumers remember about a brand is its color. The print on matte OPP with a white background and multiple colors gives the package a very rich look, and the shelf appearance influences the consumers to buy the product. The structure of the package is 20µ matte OPP + 12µ metalized PET + 60µ LDPE-TR and maintains the required barrier for the chips.

GOLD AWARDS

INDUSTRIAL COMPOSTABLE COFFEE POD LIDDING & MOTHER BAG

Gold Award – Sustainability

Manufacturer: TC Transcontinental Packaging, www.tctranscontinental.com/packaging

End-User/Customer: Maxwell House Coffee Canada

Plant: Brooklyn, NY

Designer/Design Firm: Information not available

Key Suppliers: Information not available

Description: Both the pod lidding and mother bag are certified by the Biodegradable Products Institute (BPI), meaning that it is certified to break down in industrial composting. They are made from a high percentage of plant-based materials, providing a sustainable solution for the single-serve coffee industry to mitigate landfill waste. The entire solution has a circular design with renewable inputs into the materials and a no-separation pod design to ensure easy consumer disposal into the organics collection to be processed as industrial compost. The compostable lidding film has a good sealing performance because it seals onto the unique industrial compostable soft pod design and brown ring. The mother bag protects the pods and provides a barrier, all to help mitigate contamination in the end stream.

INFUSED FACE MASK

Gold Award – Shelf Impact

Manufacturers: Karlville (www.karlville.com) & The Packaging Lab (www.thepkglab.com)

End-User/Customer: Nufabrx

Plant: Brooklyn Park, MN

Designer/Design Firm: The Packaging Lab

Key Suppliers: The Packaging Lab

Description: Not all masks are created equal. The copper-infused face mask is impregnated with Shea Butter moisturizer to help doctors, first responders, and millions of people who are experiencing redness, irritation, or “maskne” caused by masks. For the packaging, the pouch is digitally printed, thermally laminated, and pouched all within 24 hours. To give a moisture barrier, the brand owner chose a BOPP. The structure is matte BOPP (1.1 mil)/EVA/ink /EVOH/PE (3.5 mil).

NUTRA DATES 3D POUCH

Gold Award - Printing

Manufacturer: Emirates Printing Press, L.L.C.,

www.eppdubai.com

End-User/Customer: Al Foah Dates

Plant: Dubai, UAE

Designer/Design Firm: Information not available

Key Suppliers: Information not available

Description: The Nutra Dates 3D Pouch compliments the contrast between the matte look with a patterned golden metallic design. The date image is designed to create a superior impact on the shelf and comes with a reclosable zipper to maintain product freshness and laser scoring for consumer convenience.

RUFFLES® LIME AND JALAPEÑO ANTHONY DAVIS BAGS

Gold Award - Packaging Excellence

Gold Award - Printing

Gold Award - Shelf Impact

Manufacturer: Printpack, www.printpack.com

End-User/Customer: Frito-Lay

Plant: Villa Rica, GA

Designer/Design Firm: Information not available

Key Suppliers: Information not available

Description: Ruffles® new Lime and Jalapeño chip flavor is a collaboration between two bold and dynamic brands, Ruffles® and basketball star Anthony Davis. The collaboration was inspired by Davis' multidimensional personality and Ruffles® spirit of individuality. Three package designs reference Anthony Davis' #3 jersey. Each package features one of two images of Mr. Davis placed on one of three different backgrounds of bold waves. The wavy lines of the package represent both Ruffles® iconic texture and Davis' trademark unibrow. These limited-edition bags mark the first time in Frito-Lay history that a chip package features a celebrity likeness.

GOLD AWARDS

SHIELD PACK® CLEAR HIGH BARRIER ASEPTIC IBC LINER

Gold Award - Technical Innovation

Manufacturer: Amcor Flexibles, www.amcor.com

End-User/Customer: Information not available

Plant: Oshkosh, WI

Designer/Design Firm: Information not available

Key Suppliers: Information not available

Description: The Shield Pack® Clear High Barrier Aseptic IBC Liner provides the clarity and durability that the distribution process demands. This technology replaces laminated oriented metalized structures in applications where manufacturers are packaging up to 300 gallons of product for intermittent storage and transportation. The multi-layer structure safeguards against moisture, oxygen, and environmental contamination, while extending distribution range, reducing transit failures, improving product quality, and maintaining product color and vitamin retention.

VOLGA SHAHI GOLD POUCH

Gold Award - Printing

Manufacturer: Emirates Printing Press, L.L.C., www.eppdubai.com

End-User/Customer: Walq Foods Industries LLC

Plant: Dubai, UAE

Designer/Design Firm: Information not available

Key Suppliers: Information not available

Description: The Volga Shahi Gold Pouch is printed with an inline registered matte coating which makes the pouch stand out on the shelf. The high dart PE used inside the gusset improves the dart impact of the laminate, sustains drop tests, and improves bursting strength during transport and handling of the package. The artwork was designed to enhance the traditional feel. The matte and glossy look of the pouch creates excellent shelf appeal, helping it catch the immediate attention of the user. A 3D pouch technique was used to replace the conventional pouching and woven bag.

SILVER AWARDS

Listed alphabetically by package name.

50% RECYCLED CONTENT MULTI-USE E-COMMERCE MAILER

Silver Award – Packaging Excellence

Silver Award – Sustainability

Manufacturers: Berry Global (www.berryglobal.com) & PAC Worldwide Corporation (www.pac.com)

End-User/Customer: PAC Worldwide Corporation

Plants: Danville, KY and Middletown, OH

Designer/Design Firm: Information not available

Key Suppliers: Information not available

Description: Berry Global and PAC Worldwide Corporation co-developed a multi-use e-commerce mailer that contains an industry-leading 50% recycled content. Using a proprietary blend, this mailer advances the circular economy through a material reduction of 20% when compared to competing mailers and the prior mailer used. Also, this mailer is part of a family of mailers that utilize an exclusive closed-loop system of recycled content supplied in partnership with one of PAC Worldwide's e-commerce customers. Uniquely engineered for best-in-class output, high-opacity, low-light transmission, high-performance seal characteristics, and extreme toughness, this mailer helps e-commerce brands meet sustainability objectives without compromising on performance.

AMAZON TEA STAND-UP POUCH

Silver Award – Printing

Manufacturer: Emirates Printing Press, L.L.C., www.eppdubai.com

End-User/Customer: Al Maras Tea Filling Factory

Plant: Dubai, UAE

Designer/Design Firm: Information not available

Key Suppliers: Information not available

Description: The Amazon Tea Stand-up Pouch is designed to create a superior impact on the shelf. The key features include rich vibrant colors and appealing visual effects achieved with 8 color gravure printing which makes the pouch distinctive. The printing on matte OPP with a very high-resolution product image gives the package a unique look. This pouch, both functional and elegant, is designed with a resealable zipper that keeps the product fresh for a longer time.

SILVER AWARDS

AUNT MILLIE'S LIVE™ ORGANIC BIOVANTAGE™ BAKERY BAG

Silver Award – Sustainability

Silver Award – Technical Innovation

Manufacturer: Berry Global, www.berryglobal.com

End-User/Customer: Aunt Millie's

Plant: Macedon, NY

Designer/Design Firm: Information not available

Key Suppliers: Information not available

Description: Aunt Millie's Live™ Organic is a new family-farmed organic bread emphasizing social and environmental responsibility strengthened through the use of Berry Global's BIOVANTAGE™ bakery film. This film contains 50% renewable, bio-based PE sourced from sugarcane. BIOVANTAGE™ is a drop-in for traditional PE films, with no change in performance or packaging properties. Also, BIOVANTAGE™ films are How2Recycle prequalified. Through the use of BIOVANTAGE™, Biorenewable Content (BRC) certified inks, and 15% downgauging, Aunt Millie's reinforced the appeal of the Live™ Organic product line to the target audience of environmentally and socially responsible consumers.

BROOKSIDE HERSHEY'S EXOTIC DARK POUCH

Silver Award – Technical Innovation

Manufacturer: Paharpur 3P, www.paharpur3p.com

End-User/Customer: Hershey India Private Ltd.

Plant: Ghaziabad, Uttar Pradesh, India

Designer/Design Firm: Paharpur 3P and Hershey India Private Ltd.

Key Suppliers: Ester Industries Ltd., Henkel Adhesives Technologies India, and Sakata Inx

Description: This innovative peelable strip in a pouch was developed where the consumer initially sees the existing branding (Brookside) and then peels the strip away to unveil the new Hershey branding (Hershey's Exotic Dark). The strip is an integral part of the pouch and is not a pressure-sensitive paper label. Paharpur 3P developed this concept, modified existing equipment, and was able to manufacture the pouches with a zipper and bottom gusset plus the registered strip with minimum tolerance. The challenge was to develop the laminate structure for the pouch and strip that looks similar to the existing laminate and exhibits good heat seal and easy peel properties. The specifications of the base gusset of the pouches were slightly changed, and it passed all hurdles of machinability/barrier properties and standability.

CAPAO CACAOFRUIT SMOOTHIE BALLS

Silver Award – Shelf Impact

Manufacturer: ProAmpac, www.proampac.com

End-User/Customer: Mondelez

Plant: Hartford, WI

Designer/Design Firm: Bulletproof

Key Suppliers: Information not available

Description: CaPao brought to market their Cacaofruit Smoothie Balls—little balls of goodness combining cacaofruit pulp with other fruits, nuts, and seeds to deliver a completely new plant-based snack experience. These bite-sized nourishing snacks are produced in a wind-powered manufacturing facility and are individually wrapped on a high-speed vertical form/fill/seal line with a unique recyclable high-barrier paper touch film, then placed in reclosable pouches also made with a unique recyclable high-barrier paper touch structure.

KRAKATOA HOT CHIPS, 6.7 OZ.

Silver Award – Shelf Impact

Manufacturer: Printpack, www.printpack.com

End-User/Customer: Amplify Snack Brands

Plant: Villa Rica, GA

Designer/Design Firm: Jeff Day and Joanie Cahill, Amplify Snack Brands

Key Suppliers: Information not available

Description: The north star of Krakatoa Hot Chips is “heat.” As such, the brand is named after Mount Krakatoa, a volcano in the Indonesian Islands famous for one of the most violent explosions in human history. To that end, Krakatoa’s logo doubles as both the human mouth “on fire” as well as a volcano erupting. The brand has five trademarked names that represent a flavor experience that ranges from spicy to volcanic as measured by the brand’s “KraK Scale.” The “KraK Scale” is featured prominently on the back of the bag so consumers know exactly what they are getting into.

SILVER AWARDS

NUMI TEA

Silver Award – Sustainability

Manufacturers: Plastic Suppliers, Inc. (www.plasticsuppliers.com) & Elk Packaging (www.elkpackaging.com)

End-User/Customer: Numi Tea

Plant: Columbus, OH

Designer/Design Firm: Information not available,

Key Supplier: Plastic Suppliers, Inc. (PSI), EarthFirst® PLA sealant film supplier

Description: Timed with a brand refresh, Numi Tea introduced a new plant-based package for their individually wrapped tea. This new pouch incorporates renewable, bio-based plastic, including EarthFirst® PLA sealant film, instead of fossil fuel-based plastic. Every layer of the packaging is now plant-based. The tea packages passed ASTM D6868 biodegradation testing for disintegration and ecotoxicity, making the tea wraps compostable in commercial facilities. Now, Numi Tea packages naturally lower the carbon footprint of the packaging.

RESET360 LARGE FORMAT PROTEIN POUCH

Silver Award – Printing

Manufacturer: Nosco, www.nosco.com

End-User/Customer: Reset360

Plant: Carrollton, TX

Designer/Design Firm: Information not available

Key Suppliers: Film suppliers: Advanced Converting Works and Nobelus®; ink supplier: HP Indigo ElectroInks; closure manufacturer: Zip-Pak®; and the printing press supplier: HP Indigo 20000

Description: When Reset360 came to Nosco seeking a large format digital flexible packaging pouch with metallic color, Nosco's team of engineers and graphics experts went to work on a solution. Because metallic print cannot be attained on press today, the team first recommended a metPET material for its metallic properties. They then paired this material with the appropriate screen values to allow for the desired metallic effect to show through—matching the metallic PMS color originally requested by the customer. Premium white ink was then printed in the areas where Reset360 did not want a metallic effect, which provided the clean look desired. This pouch features 5 HP Indigo ElectroInk colors.

SMITHFIELD PRIME FRESH DELICATESSEN

Silver Award - Expanding the Use of Flexible Packaging

Manufacturer: Berry Global, www.berryglobal.com

End-User/Customer: Smithfield Foods

Plant: Milwaukee, WI

Designer/Design Firm: Berry Global

Key Suppliers: Information not available

Description: The Smithfield Prime Fresh Delicatessen package is a proprietary dual-forming web engineered to mirror packaging typical to cold cuts just sliced at the deli counter. The Prime Fresh package is the only deli meat package of its kind. It is a surface-printed coextruded film with high-barrier properties, enabling it to replace laminated structures that are typical to processed deli meat. Through an innovative extrusion process and careful material selection, this package offers improved shelf life and enhanced consumer experience, while eliminating the PET web typical to laminations. The Prime Fresh bag also uses 31% less material than the conventional tubs that hold competing pre-sliced deli meat, resulting in other sustainability benefits like fewer transportation miles and less product waste.

who can give their
flexible packaging
the power of
sustainability?
you can.

The Power of Sustainable Packaging.

Today's consumers are more environmentally conscious than ever — that's why we're committed to innovative flexible packaging solutions that are good for the environment and the bottom line. At Sun Chemical, helping you meet your sustainability goals just comes naturally.

Request your copy of Sun Chemical's
Guide to Sustainable Packaging at
