### **Pregis receives ISO 14001:2015 certification for two EU plants**

**Heerlen, the Netherlands**, February 22, 2022— Pregis, a leading global manufacturer of protective packaging systems, has received ISO 14001:2015 certification for its Heerlen, the Netherlands, and Herbrechtingen, Germany manufacturing facilities.

The facilities manufacture air cushioning material for use with Pregis' MINI PAK'R® and AirSpeed® brand equipment, as well as void fill packing chips (loosefill). All product lines include recycled content.

Achieving ISO 14001:2015 demonstrates that an organization is managing its environmental responsibilities in a systematic manner that contributes to the environmental pillar of sustainability.

"This latest environmental accreditation is just one more example of Pregis' efforts to support a circular economy by creating the highest quality products, while maximizing recycled content and reducing raw material dependence," said Pieter van Dongen Torman, commercial director, Pregis Europe.

As a signatory of [The Climate Pledge](#), Pregis is on a mission to help companies choose protective packaging solutions that are suited to specific applications, so they can be confident they're doing their part to protect the environment. Additionally, the company's 2K30 initiative includes real, measurable goals, close cooperation with Pregis partners, vendors and customers worldwide. The goal is to contribute to protecting and preserving the planet for generations to come.

"Our commitment to Protect, Preserve and Inspyre is designed to create a better world through the development of new marketplaces for greener, lower-carbon products and services," van Dongen Torman said. "This new ISO certification supports those objectives."

#### **About Pregis**

Pregis LLC is a customer-driven solutions provider of innovative flexible packaging, protective packaging materials, equipment systems and surface protection. As a material neutral company, the company works with its customers to find the right solution to solve their business challenges. Pregis is dedicated to minimizing impact on the environment by developing products which protect against damage, are designed for circularity and preserve natural resources. The company serves a wide variety of consumer and industrial market segments including food, pharmaceutical, healthcare, medical devices, agricultural, e-commerce, retail, automotive, transportation, furniture, electronics, building, construction and military/aerospace.
